

The DST Security Product Range

DST are proud to be partnered with the leading names in Antivirus and Internet Security.

The world-class McAfee® Anti-Virus Emergency Response Team (AVERT) provides businesses with the services and products required to react quickly to intrusions on desktops, servers and the network and to protect computer systems from the next generation of blended attacks and threats. With unequaled anti-virus expertise and extensive worldwide support, AVERT will advise and alert, not alarm.

SurfControl plc, a world leading Internet security company since 1997, delivers on its promise to shield organizations from known and emerging Internet threats... before they jeopardize the organization. With continuous innovation, invention and expansion of its filtering solutions, SurfControl is the leader in the Content Security market.

DST and its partners can provide you with a security solution that will protect your IT investment and give you peace of mind. Whether you know what you want or you would like to discuss your needs with one of our security experts, contact us now and we will identify the most appropriate and cost effective solution for your business.

Anti spam

With powerful features and a user-friendly interface, McAfee® SpamKiller® solutions put you in control of junk email and provides world-class anti-spam software for medium and small businesses, right out of the box.

Anti-Virus

McAfee® anti-virus software products for medium and small businesses continues to set the standard for reliability, ease-of-use, and cutting-edge technology.

Host Intrusion Prevention

The McAfee® delivers the industry's most powerful host intrusion prevention solutions that protect critical systems and applications, thus preserving the availability, integrity and confidentiality of data and ensuring business availability.

Network Intrusion Prevention

McAfee® IntruShield's market-leading intrusion prevention solutions redefine the deployment of network security by enabling Enterprises, Carriers and Service Providers to deploy the most comprehensive intrusion prevention for proactive threat protection against known, zero-day, denial of service and encrypted attacks. IntruShield's pioneering technology provides unparalleled prevention accuracy, centralized management, enterprise-class scalability and

mission-critical performance for all network environments.

Secure Content Management

Securing content entering and leaving organizations is essential in today's multi-faceted networking environments. It is essential to ensure that your organization has comprehensive coverage against inappropriate, malicious or viral content. McAfee® Secure Content Management solutions deliver integrated, flexible technology for SMB and Enterprise organizations to optimize resources, increase productivity and prevent industry and company policy compromises.

Spyware

McAfee® Anti-Spyware Enterprise uses true On-Access scanning to proactively block, identify and safely eliminate applications such as spyware, adware, keyloggers, cookies and remote-control programs

Surfcontrol

SurfControl knows that every business has unique requirements regarding how, when, where and by whom the Internet can be used.

Use SurfControl to continuously monitor and control content entering or leaving your enterprise e-mail system to eliminate spam, block phishing, and ensure confidentiality and compliance.

SurfControl Enterprise Threat Shield stops spyware, adware, keyloggers, instant messaging (IM), peer-to-peer (P2P), games and any other potentially malicious applications from damaging your network and business.

Managed Security Services

Outsource the burden of IT security to the experts at DST and enjoy industry-leading protection without the cost or the hassle of traditional deployments.

Whilst we are happy to supply the products for you to install and maintain, we are often asked to undertake either or both of these tasks.

This ensures that your IT infrastructure is secured to the fullest extent through professional set-up of your chosen packages, and gives you the confidence that this protection will continue in the light of new, unknown future threats to your data and systems.
